

The Ultimate Modern Stone Façade Solution

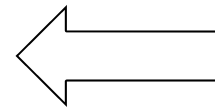

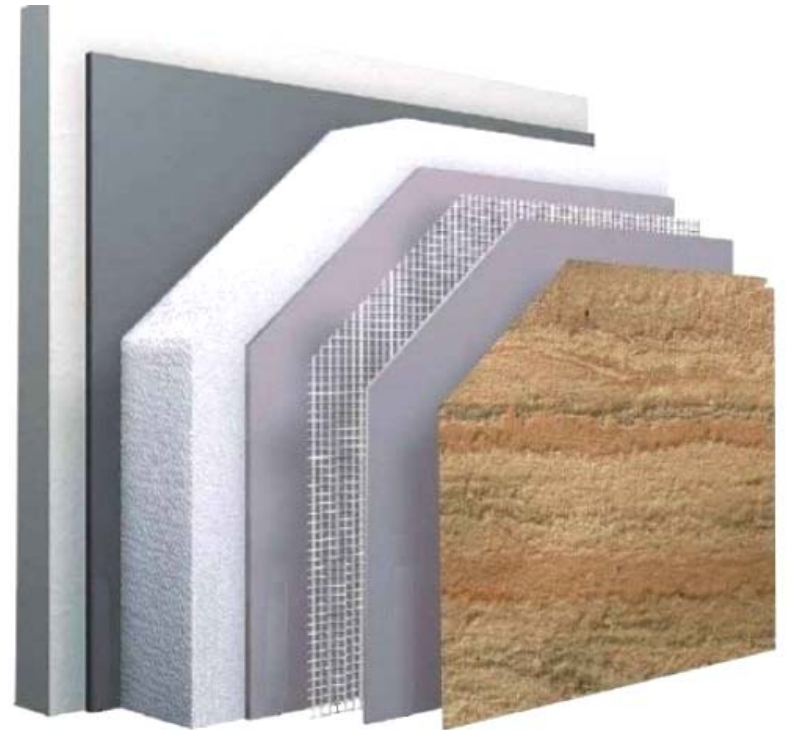

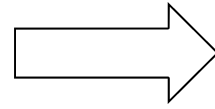

High Quality, Eco-friendly, Sandstone Veneer

WHAT IS IT? Literoc Sandstone Veneer is an innovative natural stone veneer slab offered exclusively in the UK by SPSenvirowall. Literoc is a high-quality, eco-friendly natural sandstone veneer quarried in Germany. SPSenvirowall are very proud to bring this great product to the UK market.

Composed of approximately 96% sandstone and 4% binding agent, Literoc is a natural product extracted without the use of toxic chemicals. This veneer is lightweight, hardwearing and will withstand our constantly changing British weather.

WHAT CAN IT DO? We can install the veneer sheets to achieve a seamless full-block stone appearance with the ability to wrap 90 degree corners or install it with wider yet closed joints to mimic rainscreen cladding. Literoc Sandstone veneer can be applied in three dimensional shapes over most existing and new substrates.

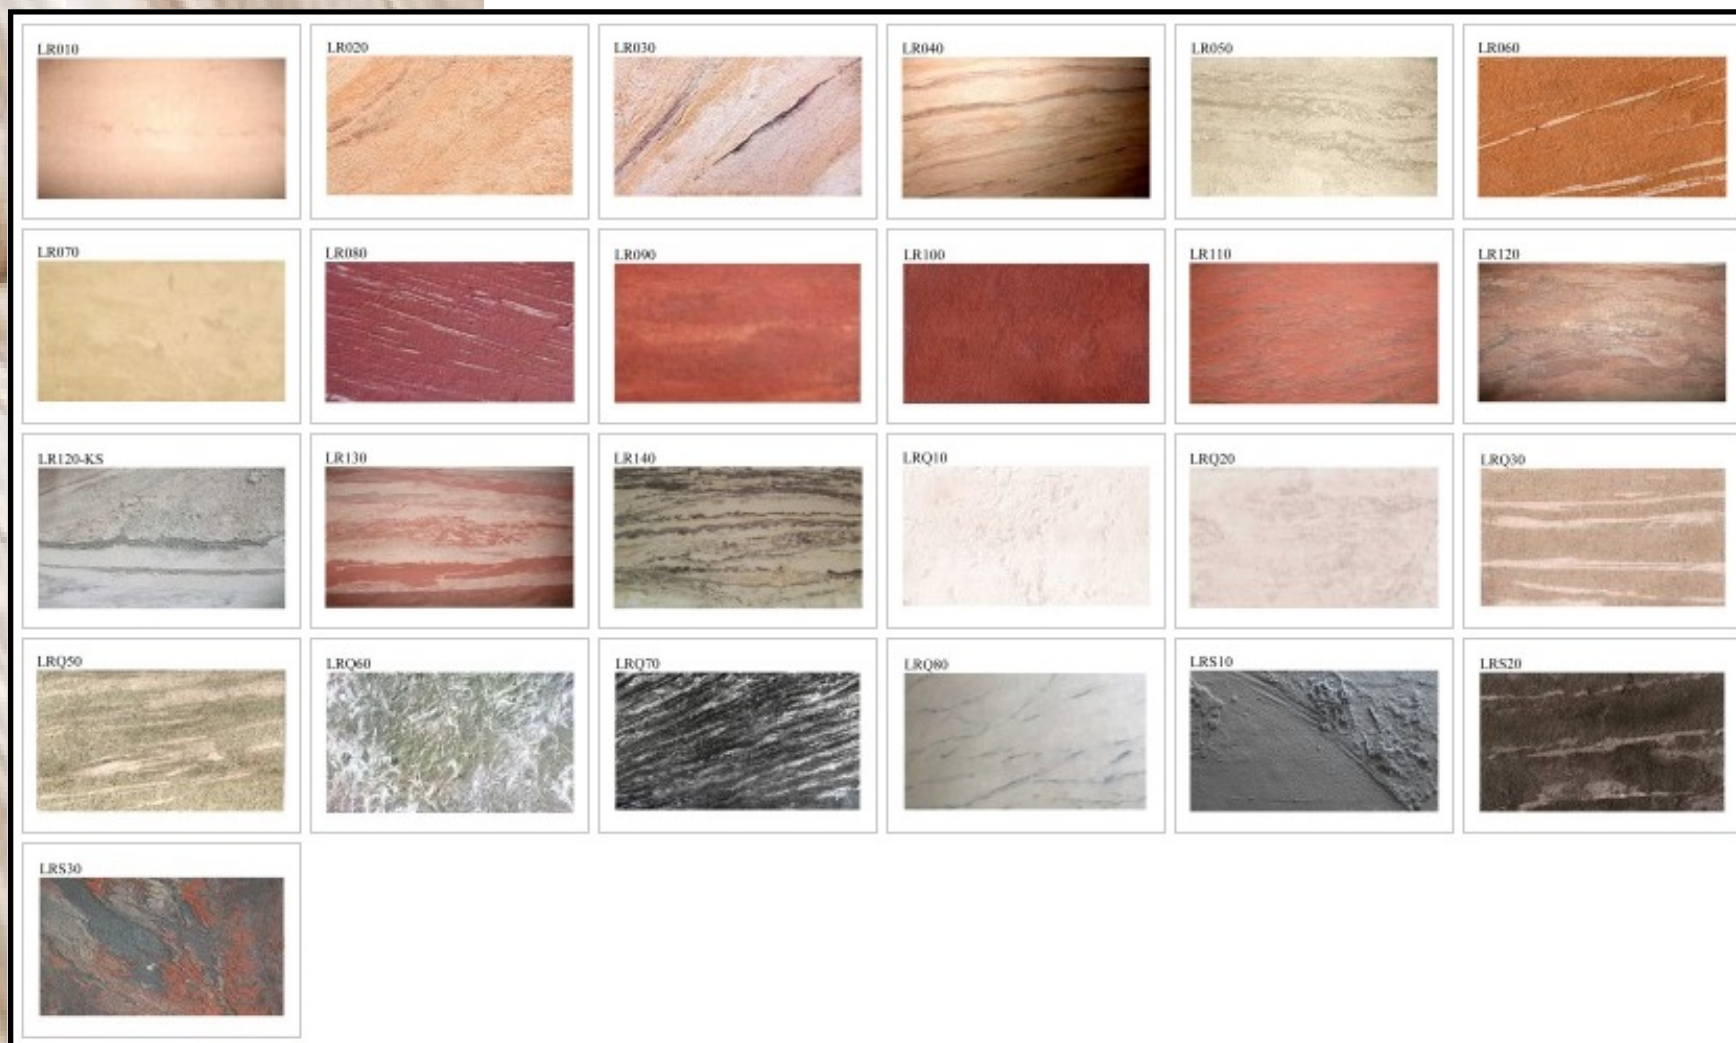

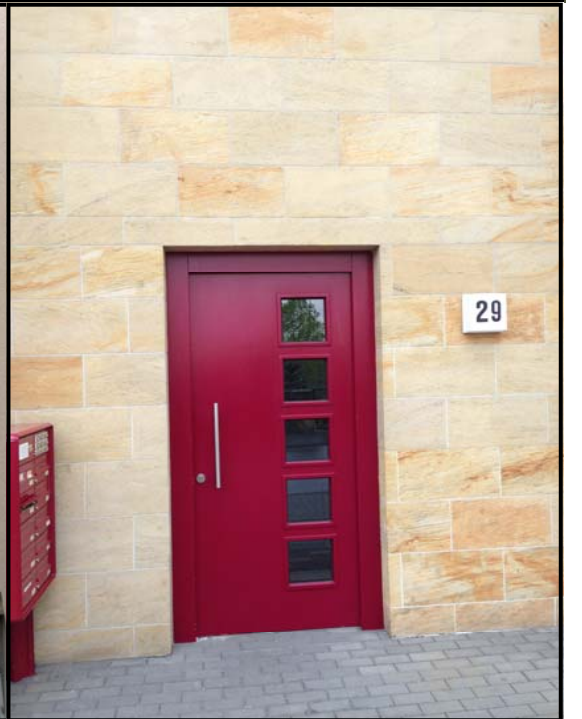

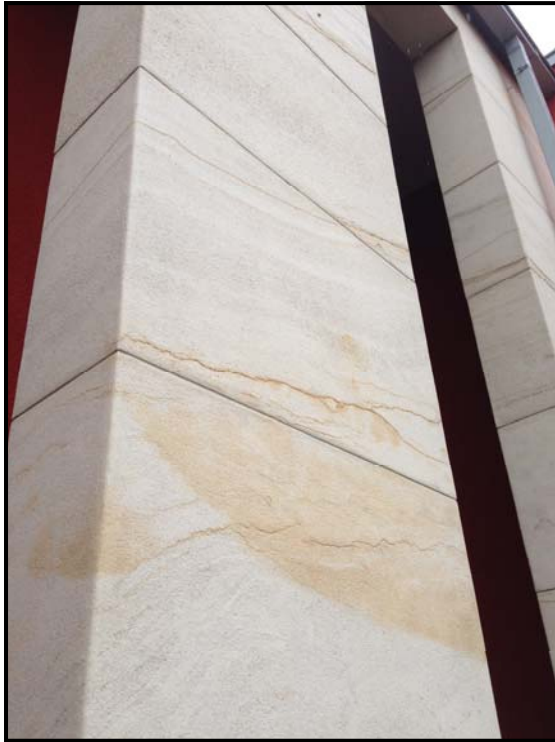

The Literoc Advantage:

- Eco-friendly product extracted using non-toxic chemicals
- Versatile indoor and outdoor design solutions can accommodate a variety of styles
- Lightweight – sheet slabs only 2-5 mm thick
- UV rays and harsh-weather resistant to withstand different weather conditions
- Sustainable—only a small amount of stone used
- Cost-effective— thin panels, no aluminium sub-construction required, no extra over cost for external corners, etc.
